

ELEVATOR ETIQUETTE FOR STAYING HEALTHY: TIPS FOR MINDFUL BEHAVIOR

1

AVOID DIRECT HAND CONTACT WITH BUTTONS

It's best not to touch the keys with your bare fingers. Opt instead for a gloved finger or use the end of a pencil or something similar to push the button.

2

AVOID CROWDS

If the elevator is already full, be patient and wait for the next one. Or consider taking the stairs instead.

3

PRACTICE SOCIAL DISTANCING

If you are in an elevator with other people, try to stand at least one meter away from your fellow passengers.

4

REGULAR CLEANING OF SURFACES

Encourage your facility manager to boost cleaning efforts so that elevator buttons, handrails, elevator car walls, doors and other surfaces are cleaned regularly with the right types of disinfectant.
